EXPERIENCE

NCINNOVATION – Durham, NC Summer 2026

Research Commercialization Intern

- Designed a standardized commercialization planning toolkit to be applied across all 47 of NCI's ventures
- Built a statewide vendor and service-provider map spanning 8 commercialization activities and 350+ entities
- Advised executive leadership on program infrastructure, including adoption of a self-developed software

NC IDEA – Chapel Hill, NC Jan 2026-Present

Startup Analyst Associate – Part-Time

- Evaluate ~25 early-stage companies per grant cycle, focusing on product, market, traction, and scalability
- Lead due diligence for semifinalists through founder interviews and comprehensive assessments

UNIFOUNDERS (UNI-FOUNDERS.COM) – Remote 2023-2025

Software helping early-stage university innovation connect, collaborate, and launch across campuses.

Founder

- Designed, built, and maintained a platform to advise and connect 20+ student startup founders across 3 universities with alumni mentors
- Partnered with and served as CRO of BUILT, a UVA-backed, AI-powered tech transfer platform matching research faculty with commercial partners

AMAZON – Seattle, WA Summer 2022

Software Development Engineer Intern

- Developed seller-facing automated messaging for Amazon's 1.5M third-party sellers across 18 countries to reduce remediation needs for broken/returned orders
- Mastered 10+ new tools and languages within 3 weeks to accelerate onboarding and project contributions
- Authored and presented a technical design document outlining proposed solutions and trade-offs to the team

NASA – Hampton, VA Summer 2021

Mission Integration Project Lead Intern

- Led a team of eight in designing a conceptual manned sample-return mission to Mars, focusing on mission integration and feasibility
- Presented findings and design mockups to NASA scientists and program directors
